Feedback on team dynamics:

1. How effectively did your group work together?

We were pretty cooperative and understanding and we let everybody have their autonomy for their tasks, we did have a couple of disagreements but we solved it with a middle ground for all of us so all in all we were a pretty good team.

2. Were the behaviours of any of your team members particularly valuable or detrimental to the team? Explain.

Feras was a very valuable team member as he made most of the presentation design and half of its contents, the other team members played a role as well but if I had to pick one out of all of them it would definitely be Feras.

3. What did you learn about working in a group from this project that you will carry into your next group experience?

That we can solve a solution for all parties using a middle ground that satisfies all, this has been a valuable learning experience for all of us both in terms of the contents we were researching and the teamwork we had.
